

1. Record Nr.	UNINA9910719601903321
Titolo	Bioelectrical impedance analysis of body composition : Applications in sports science // edited by Elisabetta Marini, Stefania Toselli
Pubbl/distr/stampa	Cagliari : , : UNICApress, , 2021
Descrizione fisica	1 online resource (225 pages)
Disciplina	613.71
Soggetti	Sports sciences Impedance, Bioelectric
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book represents the result of an interdisciplinary and international effort to provide an updated overview of the theoretical and methodological principles of bioimpedance, and their applications in sports science. The structure and the writing style are intended to be useful for scholars and students in a range of academic disciplines, as well as for professionals wishing to expand and consolidate their knowledge in the field.
