

1. Record Nr.	UNINA9910719763103321
Autore	Brunello Giorgio
Titolo	EIB Working Paper 2023/01 : advanced digital technologies and investment in employee training : complements or substitutes? // Giorgio Brunello
Pubbl/distr/stampa	[Place of publication not identified] : , : European Investment Bank, , 2023
Descrizione fisica	1 online resource (52 pages) : illustrations
Disciplina	004
Soggetti	Information technology Information technology - Security measures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Using firm-level data covering the 27 EU countries, the UK and the US, we show that employers tend to reduce investment in training per employee after adopting advanced digital technologies (ADT). We estimate with a control function approach firm-level production functions augmented with two factors, the training stock per employee and digital technology use. We show that ADT use and employee training are substitutes in production, implying that an increase in the former negatively affects the marginal productivity of the latter, and that a decline in the cost of introducing ADT reduces employers' investment in training per employee. These findings point to challenges in realizing high levels of firm-sponsored training for employees in increasingly digital economies.</p>
