

1. Record Nr.	UNINA9910719767303321
Titolo	Advances in friction, lubrication, wear and oxidation in metals manufacturing // by Guanyu Deng, Hongtao Zhu, Anh Kiet Tieu, editors
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-7342-9
Descrizione fisica	1 online resource (172 pages)
Disciplina	622
Soggetti	Mining engineering - Methodology Mining engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This reprint is a collection of the research papers published in the "Advances in Friction, Lubrication, Wear and Oxidation in Metals Manufacturing" Special Issue. It acts as an update on the state of the art concerning studies on friction, wear and oxidation properties of materials; the development and performance of novel lubricants; and advanced simulation strategies for friction contacts.
