

1. Record Nr.	UNINA9910719769403321
Titolo	Performance-related material properties of asphalt mixture components // edited by Meng Ling [and three others]
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-7426-3
Descrizione fisica	1 online resource (314 pages)
Disciplina	625.85
Soggetti	Pavements, Asphalt - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This reprint contains the most recent research in pavement engineering, which mainly addresses the performance-related properties of asphalt mixtures. We hope that this reprint is helpful for researchers and pavement industries to generate a better and deeper understanding of pavement materials, pavement construction, and pavement maintenance.
