

1. Record Nr.	UNINA9910720058803321
Titolo	Anesthesia STAT! Acute pediatric emergencies in PACU : a clinical casebook // edited by Susan T. Verghese
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2023] ©2023
ISBN	9783031243967 9783031243950
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (324 pages)
Disciplina	617.96083
Soggetti	Pediatric anesthesia Pediatric emergencies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	PASSING THE BATON: Check list /PACU Hand OFF- What is Best? -- Anaphylaxis after Antibiotics -- Sudden Somnolence after V-P shunt revision in an infant -- Emergence Delirium in a Toddler -- Cardiac Arrest after Central line placement in a child -- Foreign Body Aspiration after EGD in a 6-year-old child -- Intractable Cardiac Arrhythmias after bone marrow biopsy in a child with leukemia -- Shoulder Pain/Tachycardia after liver biopsy in a teenager -- Teenager with acute NPPE after hardware removal -- Latex Allergy developing in a child with spina bifida after suprapubic catheter placement -- O2 desaturation in a teenager after Esophagoscopy, Dilatation and Biopsy -- Respiratory Arrest in an Obese teen after Cardiac Cath procedure -- Inability to walk after Caudal anesthesia in a toddler -- Croupy Cough and Oxygen Desaturation in ex-premature toddler -- Postop Apnea in an infant after Spinal Anesthesia for hernia repair -- Persistent Vomiting after eye muscle surgery -- Blindness after bone marrow harvest in a healthy patient -- Tachycardia and Hypertension in a teen after goiter surgery -- Prolonged Apnea after treatment of Laryngospasm in a child after Botox injection -- Seizures in a child after Caudal block for circumcision -- Hyperthermia in a child after Dental Rehabilitation -Is this M.H? -- Oxygen Desaturation after Bariatric surgery in a teenager -- Confusion and sudden onset of left

sided Weakness in a teen with Sickle Cell Disease (SCD) after gall bladder surgery -- Profound Bradycardia in a child after Dexmedetomidine treatment for agitation on induction and after extubation – To treat or not to treat ?.

Sommario/riassunto

This case-based book comprehensively covers the clinically significant problems that can occur in children in the immediate postoperative period after surgery after admission to Post Anesthesia Care Unit. Chapter authors first focus on how clinical monitoring and safety of post-op patients can and must continue after hand off to the PACU team and then describe 24 interesting clinical scenarios that needed urgent intervention in PACU. The goal of this book is to teach members of the perioperative teams around the globe how to keep anesthesia stat calls to a minimum. Anesthesia STAT! Acute Pediatric Emergencies in PACU features contributions from leaders in pediatric anesthesiology and be an indispensable guide for the perioperative and postoperative team in preventing potential problems during the post-anesthetic period.
