	Descrizione fisica	1 online resource (145 pages)
	Collana	Studies in Applied Philosophy, Epistemology and Rational Ethics, , 2192-6263 ; ; 66
	Disciplina	170
	Soggetti	Technology - Moral and ethical aspects
		User interfaces (Computer systems)
		Human-computer interaction
		Automation
		Ethics of Technology
		User Interfaces and Human Computer Interaction
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Introduction -- Technology's philosophical meanings -- Contemporary Prometheus -- First case in point: autonomous technologies -- Second case in point: self-tracking technologies and the quantified self -- Challenges of the future -- Epistemological challenges -- Human identity's challenges -- Ethical challenges -- Conclusion.
	Sommario/riassunto	This book offers an extensive historical, philosophical and ethical discussion on the role of autonomous technologies, and their influence on human identity. By connecting those different perspectives, and analysing some practical case studies, it guides readers to dissect the relationship between machine and human autonomy, and machine and human identity. It analyses how the relationship between human and technology has been evolving in the last few centuries. Last, it aims at proposing an explanation on the reason/s why humans have been keen on developing their own autonomy's perfect avatar. .
