Autore	Dagiliene Lina
Titolo	Circular Business Models in the Manufacturing Industry : Insights from Small Open Economies / / by Lina Dagilien, Jurgita Bruneckien, Viktorija Varanit, Justina Banionien
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	9783031288098 9783031288081
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (183 pages)
Collana	Studies in Energy, Resource and Environmental Economics, , 2731-3417
Disciplina	363.70561
Soggetti	Environmental economics Europe - Economic conditions Industrial management - Environmental aspects Strategic planning Leadership Business information services Environmental Economics European Economics Corporate Environmental Management Business Strategy and Leadership Business Information Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Transition to Circular Business Models -- Chapter 3. Circular Performance of Small Open Economies -- Chapter 4. Circular Patterns of Manufacturing Companies -- Chapter 5. Circular Transformation of the Textile Industry -- Chapter 6. Circular Transformation of the Furniture Industry -- Chapter 7. Circular Transformation of the Plastic Industry -- Chapter 8. Concluding Remarks and Insights. .
Sommario/riassunto	The book takes a multi-level perspective, focusing on circular business

models by manufacturing industries in European small open economies. The book conceptualises circular business models and combines theoretical foundations with best practices when such models appeared in the textile, furniture, and plastics industries. It also explores barriers, drivers, challenges, and opportunities for leading manufacturing companies to implement circular activities across the value chain. This book offers a qualitative and transformative approach, spread across three different manufacturing industries, towards a circular transition. The findings will be of interest to practitioners and managers, policymakers, and general readers who are interested in the circular economy and environmental sustainability.
