

1. Record Nr.	UNINA9910720081503321
Titolo	Dicotyledons : Rosids / / Urs Eggli and Reto Nyffeler
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG , , [2023] ©2023
ISBN	9783030934927 9783030934910
Edizione	[Second edition.]
Descrizione fisica	1 online resource (1155 pages)
Collana	Illustrated Handbook of Succulent Plants
Disciplina	583
Soggetti	Dicotyledons
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface to the Second Edition -- From the Preface to the First Edition -- General Introduction to the Series -- Setup of the Handbook Series -- What is a Succulent? -- Succulence Amongst Flowering Plants -- Division of the Handbook into Individual Volumes -- References -- How to Use This Handbook -- Sequence of Information -- Scope of Information Presented -- Families -- Genera and Species -- Infraspecific Taxa -- Cultivars, Hybrids -- Phylogenetic Diagrams -- Descriptions -- Measurements -- Terminology -- Typification -- Nomenclatural Status of Names -- Synonymies -- Geographical Names -- Literature References -- Illustrations -- Indication of Authorships of the Handbook Texts -- References -- Contents -- List of Abbreviations and Symbols -- Symbols -- General Abbreviations -- Abbreviations in Plant Descriptions -- About the Editors -- Contributors -- Introduction to the Diversity of Succulent Rosids -- General Remarks -- Diversity of Succulents in Rosids -- Types of Succulence and Life Strategies in Rosids -- Evolutionary Diversification of Succulence in Rosids -- References -- Part I: Anacardiaceae -- Anacardiaceae -- References -- Operculicarya ANACARDIACEAE -- References -- Pachycormus ANACARDIACEAE -- References -- Part II: Begoniaceae -- Begoniaceae -- References -- Begonia BEGONIACEAE -- References -- Part III: Bixaceae -- Bixaceae -- References -- Amoreuxia BIXACEAE -- References -- Cochlospermum BIXACEAE -- References -- Part IV:

Sommario/riassunto

The succulent species of the families of subclass Rosidae are presented by alphabet of families, genera, and species, with comprehensive listings of synonyms added at all levels. Detailed descriptions are given for all accepted taxa, together with data on the distribution and typification, and references to the most important literature. Where necessary, information on ecology, ethnobotany, history, etc. is added, and in many places, proposed relationships are critically discussed. The volume covers the succulents from the families Anacardiaceae, Begoniaceae, Bixaceae, Brassicaceae, Burseraceae, Capparaceae, Caricaceae, Clusiaceae, Cucurbitaceae, Euphorbiaceae, Fabaceae, Francoaceae, Geraniaceae, Malvaceae, Melastomataceae, Meliaceae, Moraceae, Moringaceae, Oxalidaceae, Passifloraceae, Sapindaceae, Tropaeolaceae, Urticaceae, Vitaceae and Zygophyllaceae.
