Pubbl/distr/stampa	Bern : , : Peter Lang International Academic Publishing Group, , 2018
Descrizione fisica	1 online resource (182 pages)
Disciplina	004.678
Soggetti	Internet Satisfaction Tuning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Personalised internet applications - Human - computer interaction - Technology acceptance model - Website evaluation - User satisfaction - Development of a research model - Structural equation modelling - Expert interviews - Success factors.
Sommario/riassunto	The study focuses on user satisfaction with websites and personalised internet applications in particular. The abundance of information on the web is increasing more and more. Therefore, the significance of websites targeting the users' preferences, like personalised Internet applications, is rising. The aim of this study was to find out which factors determine user satisfaction with personalised internet applications. Factors like the usefulness of the information or trust towards how personal information is handled were considered. A large-scale user survey evaluating three internet applications (from the travel, e-learning and real estate domains) was conducted. Expert opinions were collected to complement the results and provide insights from users' and experts' points of views.
