1. Record Nr.   UNINA9910720570603321

Autore   Hart Glen

Titolo   Linked Data : A Geographic Perspective / / Glen Hart and Catherine Dolbear

Pubbl/distr/stampa   Boca Raton, Florida : , : Taylor & Francis, , 2013

Descrizione fisica   1 online resource (xx, 268 pages)

Disciplina   910.2854678

Soggetti   Semantic Web
Geography - Computer network resources
Geography - Data processing

Lingua di pubblicazione   Inglese

Formato   Materiale a stampa

Livello bibliografico   Monografia

Nota di contenuto   Front Cover; Contents; Preface; About the Authors; Chapter 1 A Gentle Beginning; Chapter 2 Linked Data and the Semantic Web; Chapter 3 Geographic Information; Chapter 4 Geographic Information in an Open World; Chapter 5 The Resource Description Framework; Chapter 6 Organizing GI as Linked Data; Chapter 7 Publishing Linked Data; Chapter 8 Using Linked Data; Chapter 9 OWL; Chapter 10 Building Geographic Ontologies; Chapter 11 Linking It All Together; References; Appendix A: OWL Species; Appendix B: OWL Constructs: Manchester Syntax and Rabbit; Back Cover.

Sommario/riassunto   Geographic Information has an important role to play in linking and combining datasets through shared location, but the potential is still far from fully realized because the data is not well organized and the technology to aid this process has not been available. Developments in the Semantic Web and Linked Data, however, are making it possible to integrate data based on Geographic Information in a way that is more accessible to users. Drawing on the industry experience of a geographer and a computer scientist, Linked Data: A Geographic Perspective is a practical guide to implementing Geograph.
