| Livello bibliografico   | Monografia  |
| Nota di bibliografia    | Includes bibliographical references and index.  |
| Nota di contenuto       | Contents: Preface. Preface to the First Edition. Introduction. Basic Factor Models. Matrix Algebra and Factor Analysis. Geometric Representation of Factor Models. Diagonal and Multiple-Group Analysis. Principle Factor Solutions. Confirmatory Maximum Likelihood Solutions. Determining the Number of Factors. Rotation and Interpretation of Factors. Rotation. Higher-Order Factors. Factor Scores. Relating Factors Across Studies. Data Transformations and Indices of Association. Two- and Three-Mode Factor Analysis. The Replication and Invariance of Factors. Factor Analysis as a Research Technique. Epilogue. Appendices: Data for Examples. Computer Programs for Factor Analysis. Accuracy of Computer Processing. |
| Sommario/riassunto      | Comprehensive and comprehensible, this classic covers the basic and advanced topics essential for using factor analysis as a scientific tool in psychology, education, sociology, and related areas. Emphasizing the usefulness of the techniques, it presents sufficient mathematical background for understanding and sufficient discussion of applications for effective use. This includes not only theory but also the empirical evaluations of the importance of mathematical distinctions for applied scientific analysis.   |

| Nota di contenuto       | The methodological debate and the quest for custom -- 'Armed attack' and other conditions of self-defence -- The 'armed attack' requirement <i>ratione materiae</i> -- The 'armed attack' requirement <i>ratione temporis</i> -- The 'armed attack' requirement <i>ratione personae</i> -- What future for the 'armed attack' criterion?<br>Machine generated contents note: Introduction; 1. The methodological debate and the quest for custom; 2. Conditions of self-defence; 3. The Armed Attack Requirement <i>Ratione Materiae</i> ; 4. The Armed Attack Requirement <i>Ratione Temporis</i> ; 5. The Armed Attack Requirement <i>Ratione Personae</i> ; 6. What future for the armed attack criterion? |
| Sommario/riassunto      | This book examines to what extent the right of self-defence, as laid down in Article 51 of the Charter of the United Nations, permits States  |

to launch military operations against other States. In particular, it focuses on the occurrence of an 'armed attack' - the crucial trigger for the activation of this right. In light of the developments since 9/11, the author analyses relevant physical and verbal customary practice, ranging from the 1974 Definition of Aggression to recent incidents such as the 2001 US intervention in Afghanistan and the 2006 Israeli intervention in Lebanon. The notion of 'armed attack' is examined from a threefold perspective. What acts can be regarded as an 'armed attack'? When can an 'armed attack' be considered to take place? And from whom must an 'armed attack' emanate? By way of conclusion, the different findings are brought together in a draft 'Definition of Armed Attack'.
