Sommario/riassunto

This book discusses mysticism and its possible contributions to a positive common human future. It is organized into three parts - "Studies of Mystical Traditions," "Comparative Studies of Mystical Traditions," and "Social and Ethical Implications." The approach is philosophical and critical. The contributors differ on whether or not mystical traditions would restore peaceful living and peaceful coexistence. However, the problem before this manuscript is the growing pain and suffering caused by greed in the world, greed causing economic disequilibrium, racism and divisiveness causing social unrest resulting in mass migration and refugees' crisis. Through the lens of "mystical traditions," the manuscript proposes a balance approach between material and spiritual needs of people. To strengthen human spirituality, the manuscript emphasizes practicing meditation, music, prayers, zikr, yoga, mindfulness, fasting and other methods of spiritual revival for peace within self and with others. .
