Sommario/riassunto	The 1948 war that led to the creation of the State of Israel also resulted in the destruction of Palestinian society when some 80 per cent of the Palestinians who lived in the major part of Palestine upon which Israel was established became refugees. Israelis call the 1948 war their 'War of Independence' and the Palestinians their 'Nakba', or catastrophe. After many years of Nakba denial, land appropriation, political discrimination against the Palestinians within Israel and the denial of rights to Palestinian refugees, in recent years the Nakba is beginning to penetrate Israeli public discour

of Jews and against anti-Semitism -- Chapter 19. Broad development policy guidelines -- Chapter 20. Current and future core problems of the world economy -- Chapter 21. Epilogue.

Sommario/riassunto

This book offers a comprehensive assessment of Friedrich List's economic and political thinking. It starts with a systematic positioning of List's economic theory as well as a differentiation from other economic systems. Furthermore, it examines the ethical sources of List's theory, as well as List's geopolitical, technical and economic visions. The author also introduces List as the pre-thinker of social market economy and discusses his ideas on European integration, development politics and List's assessment of the main problems of the modern world economy. The book will appeal to scholars and students of the history of economic thought and economic history, as well as anyone interested in the life and work of the German economist Friedrich List (1789-1846). This book is a translation of an original German edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.
