

1. Record Nr.	UNINA9910725087603321
Titolo	Canine Cognition and the Human Bond // edited by Jeffrey R. Stevens
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	9783031297892 9783031297885
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (147 pages)
Collana	Nebraska Symposium on Motivation, , 2947-9479 ; ; 69
Disciplina	636.70019
Soggetti	Psychology Cognition in animals Psychology, Comparative Interpersonal communication Social perception Behavioral Sciences and Psychology Animal Cognition Cross-species Comparison Communication Psychology Social Cognition Gossos Relacions ésser humà-animal Psicologia Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1 Of Dogs and Bonds -- Chapter 2 Biological and Hormonal Approaches to the Evolution of Human-Canine Relationships -- Chapter 3 Measuring the Dog Side of the Dog-Human Bonds -- Chapter 4 A Dog's Life in the Human Jungle -- Chapter 5 Effects of University-Based AAls: Conceptual Models Guiding Research on Active Treatment Components of AAls on Stress-Related Outcomes -- Chapter 6 Canine-Assisted Interventions: Insights from the B.A.R.K. Program and Future Research Directions -- .

Dogs are a valued part of millions of households worldwide. They also serve many functions in human societies from herding livestock to detecting drugs, explosives, or illegal wildlife to providing physical assistance or emotional support to those in need. Yet, in terms of behavior and cognition, dogs have only become a serious subject of scientific study in the last 20 years. Similarly, we have recently witnessed a sharp increase in studies of canine-human interaction, exploring the motivational, emotional, cognitive, physiological, and neural mechanisms of dogs on human psychology and well-being. This book is a collection of chapters stemming from the Nebraska Symposium on Motivation, which focused on Canine Cognition and the Human Bond. The primary goal of this symposium was to bring together researchers from psychology, biology, neuroscience, and anthropology to delve deeper into the canine-human bond. These chapters describe the current state of knowledge from international experts in the fields of canine cognition and canine-human interaction. Bridging these two areas can help us better understand the canine-human bond, potentially improving the lives of both dogs and people. International experts on dog behavior/cognition and dog-human interactions Brings together researchers focusing on the dog perspective and the human perspective Interdisciplinary with experts in anthropology, biology, neuroscience, and psychology.
