Sommario/riassunto

These transactions publish research in computer-based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the semantic Web, social networks, and multi-agent systems. TCCI strives to cover new methodological, theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies, such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This twenty-second issue contains 11 carefully selected and revised contributions.

(Hans) Bakker -- Obesity as disease and deviance : risk and morality in early 21st century / Roel Pieterman -- Moral entrepreneurship revisited : police officers monitoring cannabis retailers in Rotterdam, the Netherlands / Thaddeus Müller -- Embodying the postmodern self : ecstatic ritual as a new mode of youth identity work / Philip Lewin.
Sommario/riassunto	The papers in this volume were presented in at the third conference of the European society for the study of symbolic interaction (SSSI). The theme of the 2012 conference was "Conflict, cooperation and transformation in everyday life. The fifteen papers presented across this volume and volume 45 cover a diverse range of topics, which are

divided into two main categories: "Reflections on Methods" and "Conflict and Cooperation", this volume focuses on the former. The central issue of the first four papers is how we navigate our emotional, analytical and political selves in the social worlds that we study. How do we relate to those we observe and interview? How do we deal with issues of power, suffering and politics? The following three papers provide a critical analysis of Geertz' 'Thick Description', perspectives on obesity in modern society and an analysis of the relationship between police officers and licensed marijuana coffee shop owners in Rotterdam. Contributing authors to this volume and the next come from Belgium, Canada, Sweden, the US, the Netherlands and Germany, suggesting the thriving diversity of European SSSI in terms of its research themes and methods.
