| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Information Maneuvers in and around Ukraine: What is Really Driving Conflict with Russia? -- Background -- Issues surrounding Ukraine -- What does social media say about the issues? -- Conclusions and recommendations for strategic communications -- Information Maneuvers in the Baltic region -- A distillation of multiple threat assessments and perspectives -- Analysis of social media landscape -- Conclusions and recommendations for strategic communications -- Information Maneuvers in and around Poland: Historical Revisionism and Rule of Law -- Background -- Current issues surrounding Poland -- Analysis of social media landscape in Poland versus East Slavdom -- Conclusions and recommendations for strategic communications -- |

References -- Information Maneuvers for Soviet Union 2.0 --
Background -- Features of everyday Soviet life in the twentieth century
-- Social media analysis -- Conclusions and recommendations for
strategic communications -- Finding and Analyzing Information
Maneuvers on the Fringe -- Fringe narratives: an illustrative example
involving Russia and its Eurasian ambitions -- The 'brotherhood of
nations' – a historical pattern, not an anomaly -- Eurasian integration:
coming in the near future? -- How can we analyze fringe beliefs? --
Demonstration and technical implementation -- Conclusions --
Russian media narratives on Ukraine in 2022: a computational analysis
-- Background -- Data used for this report, and method of collection
-- Our approach: signal processing (and SVD) fundamentals -- Key
narratives in 2022 in Russian media -- What's 'mainstream' and what's
'fringe' in Russian media? -- How topics changed over time in Russian
media -- Conclusions.

Sommario/riassunto

This book uniquely combines the authors' personal experiences, deep cultural and professional experience of living and working in Russia and the former USSR, and interest and experience with language and computational analysis, to shed light on a highly contemporary question: what is motivating conflict and unrest in Russia and its surrounding countries? How does Russian government suppression of information manifest in practice today, and how does it fit into the historical cultural pattern for Russia? The authors take a computational look at social and traditional media in the original languages, from Russia, Ukraine, Lithuania, Latvia, Estonia, Poland, and the English-speaking world, to glean insights and separate fact from fiction. This book helps readers interested in Eastern Europe to 'take the temperature' of the region today, but it is also of interest to readers in the policy and analysis community, because it offers a template, an analytical 'how-to' guide which aims to follow in the footsteps of CIA author Richards Heuer's 'Psychology of Intelligence Analysis', to show how state-of-the-art computational analysis techniques could be applied to similar problems in other topic areas, with the human analyst and computational techniques each working together to create a whole greater than the sum of its parts.
