Sommario/riassunto

This work focuses on the autoimmune processes that have now been proven to underlie a number of serious diseases, including diabetes mellitus, rheumatoid arthritis and multiple sclerosis. Papers explore the rapidly expanding developments in research on immune response and regulation, and their potential in the development of treatments for autoimmune diseases. The wide range of subjects covered here include: the nature of intracellular and cell surface-derived "self" antigens; competing theories of the generation of immune tolerance and their implications of current theories for research and

Nota di contenuto	Introduction -- Childhood Population in Contemporary China: Structure and Trends -- Rights to Survival of Contemporary Chinese Children and Survival Policies -- Rights and interests of contemporary Chinese Children and protection Policies -- Rights to development of contemporary Chinese children and development policies -- Culture of contemporary Chinese children and characteristic analysis.
Sommario/riassunto	This book is devoted to the description and analysis of child population, rights to survival and development, culture and policies that Chinese government made in contemporary China. The book pursues three major objectives: firstly, to objectively describe child development in contemporary China ; secondly, to analyze characteristics of child development in contemporary China; and thirdly, to review all types of policies Chinese government has made on children survival, protection and development, which played important

roles on promoting child development.
