| Sommario/riassunto | Assisted reproduction, with its test tubes, injections, and gamete donors, raises concerns about the nature of life and kinship. Yet these concerns do not take the same shape around the world. In this innovative ethnography of in vitro fertilization in Ecuador, Elizabeth F.S. Roberts explores how reproduction by way of biotechnological assistance is not only accepted but embraced despite widespread poverty and condemnation from the Catholic Church. Roberts' intimate portrait of IVF practitioners and their patients reveals how technological intervention is folded into an Andean understanding of reproduction as always assisted, whether through kin or God. She argues that the Ecuadorian incarnation of reproductive technology is less about a national desire for modernity than it is a product of colonial racial history, Catholic practice, and kinship configurations. God's Laboratory offers a grounded introduction to critical debates in medical anthropology and science studies, as well as a nuanced ethnography of the interplay between science, religion, race and history in the formation of Andean families. |

Sommario/riassunto

This book provides an in-depth look on Content and Language Integrated Learning (CLIL) and Early Childhood Education (ECE), two domains where major joint research is needed. By taking stock on theoretical underpinnings, it explores the ideal conditions for early additional language acquisition in preschool contexts through CLIL with a learner-centered approach grounded in developmentally appropriate practices (DEP) and an emphasis on the importance of play, cognition, holistic content adaptation and social-emotional learning. The book also offers a comprehensive view of how this methodological approach has already set a clear path on Pre-primary education internationally. Finally, it offers insights into CLIL pedagogies as related and adapted to Pre-primary education, resources and materials for very young learners and practical implementation from the classroom. By providing a solid empirical background on Pre-primary CLIL, along with appropriate methodological issues and practices, this book serves as a key resource to students, practitioners, academics as well as teacher educators and policy-makers in international contexts.
