Mott, Kaitlyn Logan, Jazmyne Walker, Gerald Davis, Cherae Farmer-Dixon and Pandu R. Gangula -- 5. "Interleukin" - An Essential Mediator of the Pathophysiology of Periodontitis -- By Avishek Das and Debajyoti Mondal -- 6. Role of Cellular Responses in Periodontal Tissue Destruction -- By Nam Cong-Nhat Huynh -- 7. Non-Surgical Treatment of Periodontal Diseases: Responsibilities of the Dentist and the Patient in Periodontal Therapy -- By Luis V. Maita-Veliz and Luis M. Maita-Castaneda -- 8. Advances in Locally Delivered Antimicrobials for Periodontitis Treatment -- By Irina-Georgeta Sufaru, Maria-Alexandra Martu, Ionut Luchian, Silvia Teslaru, Simona Stoleriu, Stefan-Ioan Stratul, Darian Rusu, Monica Silvia Tatarciuc and Sorina Mihaela Solomon -- 9. Trans-Resveratrol: From Phytonutrient Supplement, to Novel Nanotherapeutic Agent -- By Tracey Lynn Harney -- 10. Point-of-Care: A Novel Approach to Periodontal Diagnosis -- By Nancy Srivastava and Shivendra Rana.
Sommario/riassunto	Periodontology is a specialized branch of dentistry that deals with the

health and diseases of the periodontium, which is the supportive tissue surrounding the teeth. Periodontal diseases are common oral diseases that can affect the teeth and supporting structures, and maintaining a healthy periodontium is essential for preserving the integrity of dentition. Advances have been made in the pathophysiology, classification, diagnosis, and management of periodontal diseases over the years. This book aims to provide researchers and clinicians who deal with periodontal diseases with an overview of the latest insights regarding the periodontium and periodontal disease.
