

1. Record Nr.	UNINA9910727286403321
Titolo	Melanoma : standard of care, challenges, and updates in clinical research // edited by Sonia Macia, Eduardo Castanon
Pubbl/distr/stampa	London : , : IntechOpen, , 2023
ISBN	1-80356-399-0
Descrizione fisica	1 online resource (150 pages)
Disciplina	616.99477
Soggetti	Oncology Melanoma
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Melanoma Epidemiology: Symptoms, Causes, and Preventions -- 2. Epidemiology of Melanoma -- 3. Histological Hallmarks of Malignant Melanoma -- 4. The Value of Histopathological Characteristics and BRAF and NRAS Mutations for the Diagnosis, Risk Stratification, and Prognosis of Malignant Invasive Melanoma -- 5. Skin Substitutes and Biologic Agents for Wound Closures after Melanoma Resection -- 6. Immunotherapy of Metastatic Melanoma -- 7. Uveal Melanoma: Factors Determining Metastatic Process, Epidemiology, Diagnosis, and Treatment -- 8. Intracranial Metastatic Melanoma -- 9. Novel Therapies in Clinical Development for Advanced Disease.
Sommario/riassunto	Melanoma is an aggressive type of cancer for which treatment has dramatically evolved during the last 15 years, improving response and survival figures. This book, written by a diverse panel of experts, presents a description of the most relevant aspects of the epidemiology, diagnosis, local treatment, prognostic biomarkers and treatment for advanced disease, including the most recent research on novel molecules that are either approved or are undergoing clinical development. It includes insights on such challenging topics as when immunotherapy should be started in BRAF mutant patients, or which is the most appropriate treatment algorithm in those cases, as well as how to handle difficult and poor-prognosis melanoma cases, such as patients with brain metastases or patients with the uveal disease.
