

1. Record Nr.	UNINA9910727290203321
Titolo	Essentials of Pulmonary Lobectomy // edited by Guntug Bathan
Pubbl/distr/stampa	London : , : IntechOpen, , 2023
ISBN	1-80355-571-8
Descrizione fisica	1 online resource (120 pages)
Disciplina	617.54059
Soggetti	Cardiothoracic surgery Chest - Surgery
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Surgical Anatomy of the Lungs -- 2. Perspective Chapter: Essentials of Lobectomy under Video-Assisted Thoracoscopic Surgery for Non-Small-Cell Lung Cancer -- 3. Thoracoscopic Lobectomy in Infants and Neonates -- 4. Principles of Pulmonary Lobectomy -- 5. Segmental Resection in Early-Stage Lung Cancer -- 6. Intensive Care Unit Management after Pulmonary Lobectomy.
Sommario/riassunto	Pulmonary lobectomy is one of the most performed thoracic surgery procedures worldwide. These special operations, which have a higher risk of mortality and morbidity compared to many surgical interventions, are only possible with sufficient theoretical knowledge and experience. Anatomical lung resections, which started with mass ligation of the pulmonary hilum in the 1800s, have become specialized operations that mostly use minimally invasive methods and require individual dissection of hilar structures. However, to date, there has only been a limited number of textbooks on these complex procedures. This book, which discusses the principles of pulmonary lobectomy, was written by experts in the field of thoracic surgery and other subspecialties. Surgical anatomy, VATS lobectomy, RATS lobectomy and intensive care follow-up are discussed in detail. The textbook should be useful for surgery residents and thoracic surgeons seeking to improve their understanding and skills in pulmonary lobectomy.
