

1. Record Nr.	UNINA9910728393203321
Autore	Gu Pengfei
Titolo	New Energy Power Generation Automation and Intelligent Technology [[electronic resource]] : Proceedings of the Seventh Seminar on Digital Instrumentation and Control Technology for Nuclear Power Plant // edited by Pengfei Gu, Yang Xu, Weihua Chen, Rigang Chen, Yongbin Sun, Zheming Liu
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2023
ISBN	981-9934-55-9
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (442 pages)
Collana	Lecture Notes in Electrical Engineering, , 1876-1119 ; ; 1055
Altri autori (Persone)	XuYang ChenWeihua ChenRigang SunYongbin LiuZheming
Disciplina	621.4835
Soggetti	Nuclear engineering Electronics Security systems Data protection Industrial engineering Production engineering Electric power production Nuclear Energy Electronics and Microelectronics, Instrumentation Security Science and Technology Data and Information Security Industrial and Production Engineering Electrical Power Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Test and research on electromagnetic compatibility of nuclear power plant -- Development and application of digital control system for

nuclear power -- Validation & Verification of control system software for digital Instrumentation -- Development and application of new products and technologies for nuclear safety instrumentation -- Operation and management of instrumentation and control system in nuclear power plant -- Demonstration of instrumentation and control system in nuclear power plant -- Other relevant content.

Sommario/riassunto

This book is a compilation of selected papers from the Seventh Symposium on Digital Instrumentation and Control Technology for Nuclear Power Plant, held online on January 11, 2023. The purpose of this symposium is to discuss inspection, test, certification and research for the software and hardware of Instrumentation and Control (I&C) systems in nuclear power plants (NPP), such as sensors, actuators and control system. It provides a platform of technical exchange and experience sharing for those broad masses of experts and scholars and nuclear power practitioners. At the same time, it also provides a platform for the combination of production, teaching and research in universities and enterprises to promote the safe development of nuclear power plant. Readers will encounter new ideas for realizing a more efficient and safer instrumentation and control system.
