

1. Record Nr.	UNINA9910462398903321
Autore	Manktelow Ken
Titolo	Thinking and Reasoning [[electronic resource]] : An Introduction to the Psychology of Reason, Judgment and Decision Making
Pubbl/distr/stampa	Hoboken, : Taylor and Francis, 2012
ISBN	1-283-45834-9 9786613458346
Descrizione fisica	1 online resource (329 p.)
Disciplina	153.4/2 153.42 153.43
Soggetti	Cognition Decision making Reasoning (Psychology) Thought and thinking Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; Thinking and Reasoning; Copyright; Contents; Preface; Chapter 1 : Judging and thinking about probability; Defining probability; Logical possibility; Frequency; Propensity; Degree of belief; Belief revision: Bayes' rule; Judging plain probabilities; Logical possibilities; Frequencies; Taking samples: where our information comes from; Belief updating; Base rates: neglect or respect?; Belief revision by natural frequencies; Probability from the inside and the outside; The planning fallacy; Overconfidence; The conjunction fallacy; Summary Chapter 2 : The study of reasoning: classic researchThe classical syllogism: reasoning with quantities; Validity; Reasoning with syllogisms; Patterns in human performance; Explaining the patterns of performance; Mental logic; Mental models; Probability heuristics; Summary; Chapter 3 : Reasoning with propositions; If: conditionals; Knowing p , knowing q : inferences and truth tables; Research results; The Wason selection task; Reasoning with Or: disjunctives; Research results; Wason's THOG problem; Summary; Chapter 4 : Reasoning and

meaning; Facilitation: the study of content effects
 Deontic reasoning: thinking about rules Pragmatic reasoning schemas;
 Evolutionary approaches to deontic reasoning; Decision-theoretic
 approaches; Causal reasoning: thinking about how the world works;
 Causal reasoning about general events; The covariational approach to
 causal thinking; Prior knowledge and causal models; Causal models
 theory; Single cases and counterfactual thinking; Summary; Chapter 5 :
 Explaining reasoning: the classic approaches; Mental logic; Braine and
 O'Brien's theory of If; Rips' Psycop theory; The theory of mental models;
 Mental models and conditionals
 The selection task Content and context; Illusory inferences; Causal and
 counterfactual reasoning; Summary; Chapter 6 : Explaining reasoning:
 the 'new paradigm'; Oaksford and Chater's Bayesian theory; Rational
 analysis; Matching bias; The deontic selection task; Conditional
 inference; Evans and Over's suppositional theory; The dual process
 theory; Dual processes in the selection task; Belief bias in syllogistic
 reasoning; Heuristic and analytic processes; Dual processes and dual
 systems; Dual minds; Summary; Chapter 7 : Hypothetical thinking:
 induction and testing; Induction
 Induction and deduction Category-based induction; Extensions and
 explanations; Category-based induction without categories; Abduction:
 finding explanations and causes; Induction and deduction revisited;
 Hypothesis testing; Wason's 2 4 6 task and its descendants; Confi
 rmation bias; Better hypothesis testing; Hypothesis testing in the wild;
 Hypothetical thinking theory; Summary; Chapter 8 : Decision making:
 preference and prospects; Subjective expected utility; Principles and
 problems; Complex decisions; Preference; Different utilities; Competing
 options; Framing: the effects of description
 Prospect theory: a descriptive theory of decision making

Sommario/riassunto

The area of psychological research reviewed in this book is one that is
 not only increasing in popularity in college curricula, but is also making
 an ever larger impact on the world outside the classroom. Drawing
 upon research originally cited in Ken Manktelow's highly successful
 publication Reasoning and Thinking, this completely rewritten textbook
 reflects on the revolutionary changes that have occurred in the field in
 recent years, stemming from the huge expansion in research output, as
 well as new methods and explanations, and the appearance of
 numerous books on the subject aim

2. Record Nr.	UNINA9910728793003321
Titolo	Binomial probability distribution / / Goldhil Video (Firm)
Pubbl/distr/stampa	New York, N.Y., : Infobase, [2008], c2000
Descrizione fisica	1 streaming video file (21 min.) : sd., col., digital file
Collana	Statistics: The Standard Deviants Core Curriculum
Soggetti	Probabilities Statistics Educational films. Internet videos. Videorecording
Lingua di pubblicazione	Inglese
Formato	Videoregistrazione
Livello bibliografico	Monografia
Nota di contenuto	Binomial Probability Distribution (4:20) -- Statistics: Factorials (3:54) -- Binomial Probability Formula and Exponents (3:46) -- Compound Event Probabilities (2:39) -- Binomial Distribution: Mean, Variance, and Standard Deviation (2:51) -- Statistics Review: Binomial Probability Distribution (2:08)
Sommario/riassunto	What is the binomial probability that Mickey, a lounge lizard, will get a phone number? After presenting the five characteristics of binomial probability distribution and explaining the binomial probability formula-including a review of factorials-this program examines the mean, deviation, variation, and standard deviation of a binomial probability distribution.
