

1. Record Nr.	UNINA9910728793103321
Titolo	Crash course statistics. The normal distribution
Pubbl/distr/stampa	[Place of publication not identified] : , : Crash Course Statistics, , 2018
Descrizione fisica	1 online resource (11 minutes)
Collana	Academic Video Online
Soggetti	Statistics - Study and teaching Distribution (Probability theory) Probability measures Probabilities Educational films. Short films.
Lingua di pubblicazione	Inglese
Formato	Videoregistrazione
Livello bibliografico	Monografia
Note generali	Title from resource description page (viewed April 13, 2022).
Sommario/riassunto	Today is the day we finally talk about the normal distribution! The normal distribution is incredibly important in statistics because distributions of means are normally distributed even if populations aren't. We'll get into why this is so - due to the Central Limit Theorem - but it's useful because it allows us to make comparisons between different groups even if we don't know the underlying distribution of the population being studied.
