Sommario/riassunto

All global countries are interdependent and all aspects of the global economy operate synergistically. The COVID-19 pandemic gave a renewed sense of urgency to focus on the synergies between supply chain, climate change, COVID-19, and sustainable development as they affect business in Africa and how what occurs in one part of the world affects the whole world. This book examines this synergy and the reciprocal impact of businesses, government, and society. Featuring contributions presented at the 2022 Current Business Issues in African Countries (CBIAC) Conference held at Wagner College in Staten Island, NY, USA, this book explores topics such as agriculture, entrepreneurship, education, gender, and capital flows in Africa demonstrating the wealth of business opportunities across the continent. .
