Titolo	Delphi Methods In The Social And Health Sciences : Concepts, applications and case studies // edited by Marlen Niederberger, Ortwin Renn
Pubbl/distr/stampa	Wiesbaden : , : Springer Fachmedien Wiesbaden : , : Imprint : Springer, , 2023
ISBN	3-658-38862-5
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (316 pages)
Disciplina	605
Soggetti	Sociology - Methodology Medicine, Preventive Health promotion Sociological Methods Health Promotion and Disease Prevention
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Delphi methods: Concepts and variants -- Epistemological discussion -- Practical challenges -- Delphi in the social and health sciences -- Real-time Delphi -- Delphi markets. Application examples for Delphi methods -- Qualification requirements, recommendations for action for further development and strategy development in the health care industry -- Personnel retention and recruitment in professional care -- Group Delphi for obesity prevention- Safety and health competence at work -- Delphi methods in health promotion.
Sommario/riassunto	Delphi methods enable the systematic collection of expert judgments. They have proven to be particularly useful when a certain level of expertise and judgment is required to answer a research question. There are different variants of Delphi methods, such as the group Delphi or the real-time Delphi. The book presents current methodological developments and examples of application in the social and health sciences. This book is a translation of the original German 1st edition Delphi-Verfahren in den Sozial- und Gesundheitswissenschaften by Marlen Niederberger and Ortwin Renn,

published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2019. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. SpringerNature works continuously to further the development of tools for the production of books and on the related technologies to support the authors. The contents Delphi methods: Concepts and variants - Epistemological discussion - Practical challenges - Delphi in the social and health sciences - Real-time Delphi - Delphi markets. Application examples for Delphi methods - Qualification requirements, recommendations for action for further development and strategy development in the health care industry - Personnel retention and recruitment in occupational nursing - Group Delphi for obesity prevention- Safety and health competence at work - Delphi methods in health promotion The editors Prof. Dr. Marlen Niederberger is professor for research methods in health promotion and prevention at the PH Schwäbisch Gmünd. Prof. Dr. Ortwin Renn is Scientific Director at the Institute for Advanced Sustainability Studies, Potsdam (IASS).
