#### Sommario/riassunto

"This book examines interactions and discusses intersectionality between public international law and private international law. With contributions from scholars from USA, Canada, Australia, India, and EU, this book brings out truly international perspectives on the topic. The contributions are arranged in four themes: Public international law and private international law: historical and theoretical considerations of the boundary; Harmonisation of private international law by public international law instruments: evaluation of process, problems, and effectiveness; Case studies of intersectionality between public international law and private international law; Future trends in the relationship between public international law and private international law. The ultimate aim of this book is to analyse whether these two legal disciplines become convergent or they are still divergent as usual"-- Back cover.
