Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Sexual/Political engages with contemporary political issues in sexuality through a survey of modern philosophy, psychoanalytic thought, 20th century political theory, and more recent queer philosophies. The book investigates how the sexual has perturbed philosophical, political and psychoanalytic thought and how this has fed into discrimination against the LGBTQI community. It analyses the social stigmas applied to public and private sexual acts and the psychopolitical processes leading to the prevalence of neo-fascist populism in Italy and the world. Tracing the history of sexuality through Freud, Marx, Fanon, and Foucault, among many others, Bernini considers why the sexual has always been an exceptionally difficult object to consider in political

theory. This book will be of key interest to scholars in queer theory; antisocial theory; psychoanalysis and politics; drive theory; political philosophy; critical theory; LGBTQIA+ issues; gender and sexuality studies and Italian studies"--

Titolo	Social and Psychological Factors in Bilingual Speech Production
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (237 p.)
Soggetti	Language
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Studies in the fields of bilingualism and second language acquisition have shown that both cognitive and affective psychological factors can influence individuals' bilingual speech production. More recently, both experimental and variationist studies of bilingual communities have examined the role of social factors on bilinguals' speech, particularly in cases of long-term language contact and minority-language bilingualism. The Special Issue brings together work on the psychological and/or social factors that influence bilingual speech production as well as work that uses different methodological frameworks. We examine the role of such factors on bilingual speech production in diverse contexts, in order to provide a more holistic account of the ways in which extra-linguistic influences may affect bilinguals' speech in one or both of their languages.</p>
