Young people negotiating political participation from marginalised positions -- 7. Young people's climate activism on the move - case FinlandPart III: To be(come) seen and heard - but how and how to study it? -- 8. Participatory research with young people - too little, too much, too romanticised? Reflections on co-research with young refugees -- 9. Co-constructing knowledge of refugee youths' lives in Finland - epistemological notes -- 10. Exploring the future together with young people - methodological considerations on playfulness, joy and silence as forms of participation -- 11. "How on Earth does one find a job in Finland?" Reflections on using documentary film as research method in studying young asylum seekers' employment prospects -- Conclusion.

---

## Sommario/riassunto

"This book analyses young people's societal participation as a central dimension of their wellbeing, and as vitally important to secure the sustainable future of humankind and the whole eco-social system. It develops a theoretical framework for analysing youth participation holistically, embedded in its everyday context, and as a relational phenomenon, underpinned by universal human needs. It introduces innovative methodological approaches to study youth engagements in society. This book will appeal to scholars and students of youth studies, sociology, sustainable development, youth participation, and education. It also offers new knowledge and theoretical readings for policy experts on youth and sustainable development, as well as for NGOs working with youth"--
