

1. Record Nr.	UNINA9910729786603321
Titolo	Auditory and Phonetic Processes in Speech Perception // Richard Wright, Benjamin V. Tucker, editors
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
Descrizione fisica	1 online resource (298 pages)
Disciplina	401.9
Soggetti	Speech perception
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	In the past two decades, great advancements have been made in phonetic, auditory, and psycholinguistic research on speech perception. As the fields have advanced, there has been increasing interdisciplinary collaboration between them, which has, in turn, revealed their interdependence. The aim of this Special Issue is to bring together top scholars in these three related areas to present research in a single volume with papers ranging from the neurophysiology of hearing, to phonetic and linguistic factors, to factors related to hearing loss and assistive devices, second language learning and accentedness, and the processing of speech and the mental lexicon. We invite you all to read the high-quality papers in this Special Issue.
