Disciplina	025.284
Soggetti	Digital libraries - Collection development Archival materials - Digitization
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Shifting Stacks examines emergent issues at the nexus of academic librarianship and theological education. It seeks to facilitate and inspire forward-thinking conversation that may guide a reorientation of theological and religious studies librarianship that is adaptive and responsive to change and emerging needs in librarianship, theological education, and the broader global community. The need for substantive conversation on these topics has grown more important and critical as the effects of the current global pandemic ripple through our institutions.
