

1. Record Nr.	UNINA9910731464603321
Autore	Moran Cesar
Titolo	The Thorax : Medical, Radiological, and Pathological Assessment // edited by Cesar A. Moran, Mylene T. Truong, Patricia M. de Groot
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-21040-9
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (929 pages)
Altri autori (Persone)	TruongMylene T GrootPatricia M. de
Disciplina	617.54
Soggetti	Internal medicine Pathology Radiology Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1: Serosal Surface -- The Pleura -- Part 2: The Mediastinum -- Normal thymus -- Thymoma -- Thymic Carcinoma -- Neuroendocrine Neoplasms -- Mediastinal Germ Cell Tumors -- Mesenchymal Tumor of the Mediastinum -- Mediastinal Lymphoproliferative Disorders -- Miscellaneous Conditions -- Part 3: LUNG: Neoplastic conditions -- Non-small Cell Carcinomas -- Neuroendocrine Neoplasms of the Lung -- Salivary Gland Type Tumors of the Lung -- Biphasic Neoplasms of the Lung -- Benign and Malignant Mesenchymal Tumors of the Lung -- Pulmonary Lymphoproliferative Disorders -- Tumors of Uncertain Histogenesis -- Uncommon Tumors of the Lung -- Part 4: LUNG: Non-neoplastic Conditions -- Interstitial Lung Diseases -- Connective Tissue Diseases Associated Interstitial Lung Disease -- Pneumoconiosis -- Pulmonary Vasculitides -- Emphysema and Cystic Lung Disease -- Airspace Diseases and Pulmonary Nodules -- Infectious Diseases That May Mimic Lung Cancer -- Miscellaneous Conditions -- Iatrogenic Conditions -- Pathology of the lung allograft.
Sommario/riassunto	The current medical practice has become more of a team effort rather than an isolated practice. The current evaluation of patients in the daily

practice is essentially performed by medical assessment of the patient in question followed by diagnostic imaging, and when needed and possible the evaluation of tissue for diagnosis with its subsequent assessment of biomarkers and other ancillary tools that play an important role in the evaluation and prognosis. The book provides such assessment focused in the thoracic assessment of patients afflicted with any particular disease of the thorax. Expert clinician in pulmonary medicine provide the state of the art in the evaluation of such patients, which will provide the most important background in the clinical impression and further assessment of these patients. This assessment in most cases is followed by the evaluation of imaging, which provides a highly important information of not only the exact location of the process but also of the nature of whether is localized, infiltrative, diffuse, bilateral, etc., as well as the possible compromise of other adjacent structures. Such information is crucial as imaging and clinical information will provide a working diagnosis, which ultimately will be defined by the pathological assessment. Therefore, in real practice neither one of these subspecialties works alone or in isolation. On the contrary, each one depends on the other for the final diagnosis and proper management of patients with thoracic diseases. Based on such experience, this text provides the needed information that a clinician, radiologist or pathologist will need in order to arrive to the best possible conclusion. The scope of this book is unique in its nature as it brings all three together in a single text. This book should be of interest to all of those in the practice of thoracic medicine (radiologist, pulmonologist, pathologists) and any one who in the general practice is confronted with the evaluation of these patients.

2. Record Nr.	UNINA9910133396503321
Titolo	Survey of state criminal history information systems / / U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics
Pubbl/distr/stampa	[Washington, D.C.], : Bureau of Justice Statistics, [1997]
