Sommario/riassunto

Der erste Band des Corpus Inscriptionum Iudaeae/Palaestinae umfasst die Inschriften Jerusalems von der Zeit Alexanders bis zur Eroberung durch die Araber in allen Sprachen, die damals für Inschriften verwendet wurden: Hebräisch, Aramäisch, Griechisch, Latein, Syrisch, Armenisch. Die rund 1.100 Texte werden nach drei Zeitepochen gegliedert: bis zur Zerstörung Jerusalems im Jahr 70, bis zum Beginn des 4. Jahrhunderts, bis zum Ende der byzantinischen Herrschaft im 7. Jahrhundert.

The first volume of the Corpus Inscriptionum Iudaeae/Palaestinae covers the inscriptions of Jerusalem from the time of Alexander to the Arab conquest in all the languages used for inscriptions during those times: Hebrew, Aramaic, Greek, Latin, Syrian, and Armenian. The approximately 1,100 texts have been arranged in categories based on three epochs: up to the destruction of Jerusalem in the year 70, to the beginning of the 4th century, and to the end of Byzantine rule in the 7th century.

Corporate Social Responsibility Challenges in the Extractive Industry: A Summary.</p>
Sommario/riassunto	<p>This book examines corporate social responsibility theories and models in the context of developing countries. The developing countries are amongst the poorest countries of the world despite vast natural resources. The natural resources are mismanaged, proceeds are misappropriated, corruption and conflict are centered on resource control. Governments and Multinational Corporations (MNCs) are at the centre of the controversy of corporate social responsibility (CSR) in the affected countries. Moreover, the lack of systems, procedures and legislation to enforce CSR has led to environmental degradation and a decline in business ethics and morality. This book analyses Corporate Social Responsibility in developing countries with specific reference to the extractive industry by integrating academic and industrial perspectives. It will be of interest to researchers in the field of CSR, as well as for management professionals.</p>
