Sommario/riassunto	This book provides the advance research results of environmental pollution and governance and covers the main research field of environmental remediation, environmental monitoring, sanitation and so on. Nowadays, environmental pollution, as one of the most important problems in the world, has seriously affected the global ecology, temperature, water resources and so on. Therefore, the research on environmental governance can better help us comprehend

the methods and measures of environmental protection and protect our ecology more scientifically and effectively. This book also aims to promote scientific information interchange between scholars from the top universities, research centers and high-tech enterprises working all around the world. It is beneficial to scholars, engineers and researchers in the field of environmental engineering and environmental governance.
