

1. Record Nr.	UNINA9910733200803321
Autore	Aivaloglou Efthimia
Titolo	Proceedings of the 2nd International Workshop on Data Systems Education : Bridging education practice with education research // Efthimia Aivaloglou, George Fletcher, Daphne Miedema
Pubbl/distr/stampa	New York, NY, United States : , : Association for Computing Machinery, , 2023
Descrizione fisica	1 online resource (63 pages)
Collana	ACM Conferences
Disciplina	004
Soggetti	Computer science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	DataEd is organized for the second time as a dedicated venue for the presentation and discussion of data systems education research. The purpose of this workshop is to bring together the database and the computing education research communities to share findings, to cross-pollinate perspectives and methods, and to shed light on opportunities for mutual progress in data systems education. DataEd explores the broad area of data systems education: the teaching and learning of databases, data management, and data systems topics, ranging across the whole field, from classical topics, such as physical design, query optimization, data modeling, data integration, visual analytics, and query languages to contemporary topics, such as ML & AI for data management systems, data management for ML & AI, very large data science applications/pipelines, and responsible data management.
