Titolo	Arrow-pushing in organic chemistry : an easy approach to understanding reaction mechanisms // Daniel E. Levy
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , 2017 ©2017
ISBN	1-118-99120-6
Edizione	[Second edition.]
Descrizione fisica	1 online resource (600 pages)
Disciplina	547.2
Soggetti	Chemistry, Organic Reaction mechanisms (Chemistry)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Free radicals -- Acids -- Bases and nucleophiles -- SN2 substitution reactions -- SN1 substitution reactions -- Elimination reactions -- Addition reactions -- Carbenes -- Pericyclic reactions -- Moving forward.
Sommario/riassunto	This book uses the arrow-pushing strategy to reduce the notoriously challenging topic of organic chemistry to the study of interactions between organic acids and bases.--

Sommario/riassunto	This book records the new research findings and development in the field of industrial engineering, and it will serve as the guidebook for the potential development in industrial engineering and smart manufacturing. It gathers the accepted papers from the 24th International conference on Industrial Engineering and Engineering Management held at Central South University of Forestry and Technology in Changsha during May 19-20, 2018. The aim of this conference was to provide a high-level international forum for experts, scholars and entrepreneurs at home and abroad to present the recent advances, new techniques and application, to promote discussion and interaction among academics, researchers and professionals to promote the developments and applications of the related theories and technologies in universities and enterprises, and to establish business or research relations to find global partners for future collaboration in the field of Industrial Engineering. It addresses diverse themes in smart manufacturing, artificial intelligence, ergonomics, simulation and

modeling, quality and reliability, logistics engineering, data mining and other related fields. This timely book summarizes and promotes the latest achievements in the field of industrial engineering and related fields over the past year, proposing prospects and vision for the further development.
