

1. Record Nr.	UNINA9910733711603321
Titolo	Applied head and neck anatomy for the facial cosmetic surgeon / / Elie M. Ferneini [and three others] editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-57931-X
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (X, 256 p. 208 illus., 206 illus. in color.)
Disciplina	611.91
Soggetti	Head - Anatomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Section One: Local Anesthesia for Cosmetic Procedures -- Chapter 1: Overview of Local Anesthesia -- Chapter 2: Intraoral Maxillary Local Anesthetic Techniques -- Chapter 3: Intraoral Mandibular Techniques -- Chapter 4: Extraoral Facial Techniques -- Chapter 5: Cervical Techniques -- Chapter 6: Management of Local Anesthetic Complications -- Section Two: Regional Anatomy -- Chapter 7: Anatomy of the Integumentary System -- Chapter 8: Anatomy of the Periorbit -- Chapter 9: Anatomy of the Nose and Paranasal Sinuses -- Chapter 10: Anatomy of the Auricle -- Chapter 11: Anatomy of the Neck -- Chapter 12: Anatomy of the Chin and Neck -- Chapter 13: Anatomy of the Superficial Face: Muscles of Face and Scalp, Superficial Vessels and Nerves, Major Salivary Glands -- Chapter 14: Muscles of Mastication and the Temporomandibular Joint -- Section Three: Surgical Anatomy -- Chapter 15: Neuromodulators -- Chapter 16: Facial Fillers -- Chapter 17: Facial Resurfacing -- Chapter 18: Forehead and Eyebrow Lift Techniques -- Chapter 19: Facelift -- Chapter 20: Applied Anatomy in Blepharoplasty -- Chapter 21: Otoplasty -- Chapter 22: Chin Augmentation -- Chapter 23: Neck Lift -- Chapter 24: Hair Restoration.
Sommario/riassunto	In an era of high demand for aesthetic procedures, this text provides a practical and comprehensive look at facial cosmetic surgery to ensure practitioners have the best information available for treating their patients. The editors have extensive academic experience and have

authored multiple scientific publications, while the contributions included in the text have been written by experts and leaders in the field. Applied Head and Neck Anatomy for the Facial Cosmetic Surgeon is for a multi-disciplinary audience including oral & maxillofacial surgeons, plastic surgeons, otolaryngologists, cosmetic surgeons, and dentists. Divided into three distinct sections for ease of use, the first section focuses exclusively on localized anesthesia for each region of the head and neck. Chapters focus on the techniques that best affect these regions with a chapter closing the first section, on managing potential anesthetic complications. The second section covers the regional anatomy of the face by offering high definition photos of cadaver dissections and anatomic illustrations to highlight pertinent muscle and bone structures. The third and final section combines the skills detailed in the first two sections and applies them to a variety of surgical, cosmetic procedures. .

Sommario/riassunto

This volume is a product of the International Conference of Archaeological Prospection 2017 which was hosted by the School of Archaeological and Forensic Sciences at the University of Bradford. This event marked a return to the location of the inaugural conference of archaeological prospection which was held in Bradford in 1995. The conference is held every two years under the banner of the International Society for Archaeological Prospection. The Proceedings of 12th International Conference of Archaeological Prospection draws together over 100 papers addressing archaeological prospection techniques, methodologies and case studies from around the world. Including studies from over 30 countries distributed across Africa, North America, South America, Asia and Europe; the collection of articles covers a diverse range of research backgrounds and situations. At this particular ICAP meeting, specific consideration has been given to emerging techniques and technologies in the fields of inter-tidal and marine archaeological prospection, and low altitude archaeological prospection. The papers within this volume represent the conference themes of: Techniques and new technological developments; Applications and reconstructing landscapes and urban environments; Integration of techniques and inter-disciplinary studies, with focus on visualisation and interpretation; Marine, inter-tidal and wetland prospection techniques and applications; Low altitude prospection techniques and applications; Commercial archaeological prospection in the contemporary world.
