

1. Record Nr.	UNINA9910733727903321
Autore	Ugur Secil
Titolo	Wearing embodied emotions : a practice based design research on wearable technology // Secil Ugur
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	88-470-5247-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xi, 106 pages) : illustrations (some color)
Collana	PoliMI SpringerBriefs, , 2282-2577
Disciplina	004.16
Soggetti	Social media Research methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 2191-530X."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Human Body's Extensions -- Emotion, Design and Technology -- A Design Practice on Emotional Embodiment through Wearable Technology -- Prototyping and Testing -- Conclusion.
Sommario/riassunto	Today, people are in an era of digitally mediated Human-to-Human Interaction, which cannot provide full sensorial contact and therefore, emotions cannot be communicated completely. The intimate cover of the human body, i.e. garment is the interface, where many personal traits are embodied. With the improvements in textile and electronics industry, this embodiment can be carried on a higher level, where the garments become dynamic interfaces and extensions of the human body. This book consists of a research on skin, clothes and technology as extensions of human body, emotions, technology-mediated emotions and a design practice that explores the communicative level of wearable technology through turning it into a living surface, which can convert intangible data to tangible in order to provide an emotional communication. This book aims to show how Human-Technology interaction is carried into an alternative context, where technology dissolves in use and starts serving for enhancing HHI.
