

1. Record Nr.	UNINA9910733734603321
Autore	Kinghorn A. Douglas
Titolo	Progress in the Chemistry of Organic Natural Products 114 / / edited by A. Douglas Kinghorn, Heinz Falk, Simon Gibbons, Jun'ichi Kobayashi, Yoshinori Asakawa, Ji-Kai Liu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-59444-0
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (341 pages)
Collana	Progress in the Chemistry of Organic Natural Products, , 2192-4309 ; ; 114
Disciplina	615.19
Soggetti	Natural products Chemistry, Organic Pharmaceutical chemistry Analytical chemistry Biomolecules Physical biochemistry Molecular structure Natural Products Organic Chemistry Medicinal Chemistry Bioanalytical Chemistry Biological Structure Determination Pharmaceutics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Bioactive compounds from medicinal plants of Myanmar -- Progress in the Chemistry of Cytochalasans -- New Techniques of Structure Elucidation for Sesquiterpenes -- Human Endogenous Natural Products.
Sommario/riassunto	This book describes current understandings and recent progress in four areas: in the first one, the cytochalasans, a group of fungal derived natural products characterized by a perhydro-isoindolone core fused with a macrocyclic ring are shown to exhibit high structural diversity

and a broad spectrum of bioactivities. The second one is dedicated to a description of bioactive compounds from the medicinal plants of Myanmar, the third one is dedicated to new structure elucidation techniques in the field of sesquiterpenes. The last one discusses the endogenous natural products that are produced by human cells including endogenous amines, steroids, and fatty acid derived natural products. The co-metabolism and natural product production of the human microbiome is also described including tryptophan, bile acids, choline, and cysteine.
