

1. Record Nr.	UNINA9910734349103321
Titolo	Applications of Crystal Engineering in Drug Delivery // edited by Hisham Al-Obaidi
Pubbl/distr/stampa	[Place of publication not identified] : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
Descrizione fisica	1 online resource (310 pages)
Disciplina	615.6
Soggetti	Drug delivery systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Crystal engineering is a broad area of research that includes crystal habit modification, polymorphism, solid dispersions, and salt formation. This reprint covers state-of-the-art applications of crystal engineering and includes a combination of research and review articles, with special emphasis on novel drug delivery and targeting applications.
