

1. Record Nr.	UNINA9910734839203321
Autore	Chabert Jean-Luc
Titolo	Algebraic, Number Theoretic, and Topological Aspects of Ring Theory / / edited by Jean-Luc Chabert, Marco Fontana, Sophie Frisch, Sarah Glaz, Keith Johnson
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-28847-5
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (473 pages)
Altri autori (Persone)	FontanaMarco FrischSophie GlazSarah JohnsonKeith
Disciplina	512.4
Soggetti	Associative rings Associative algebras Commutative algebra Commutative rings Nonassociative rings Associative Rings and Algebras Commutative Rings and Algebras Non-associative Rings and Algebras Anells (Àlgebra) Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Paul-Jean Cahen (1946 – 2019) (Chabert) -- Bhargava's exponential functions and Bernoulli numbers associated to the set of prime numbers (Adam) -- Polynomial root extensions (Anderson) -- Absorbing ideals in commutative rings: A survey (Badawi) -- Complement-finite ideals (Baeth) -- When is a group algebra antimatter? (Baghdadi) -- Yosida, Martínez, and $A + B$ rings (Klingler) -- Functional identities and maps preserving two-sided zero products (Brešar) -- Bounded factorization and the ascending chain condition on

principal ideals in generalized power series rings (Mooney) -- Probabilities and fixed divisors of integer polynomials (Chabert) -- Modules over trusses vs. modules over rings: Internal direct sums (Ferdania) -- A survey on essential-like properties of Prüfer v -multiplication domains (Tartarone) -- On the subatomicity of polynomial semidomains (Gotti) -- Invertibility, semistar operations, and the ring of finite fractions (Juett) -- The quadratic tree of a two-dimensional regular local ring (Olberding) -- Reductions and core of ideals in integral domains: some recent developments (Kabbaj) -- Valuative lattices and spectra (Lombardi) -- Building 3-variable homogeneous integer-valued polynomials using generalized projective planes Marie MacDonald Around Prüfer extensions of rings (Picavet) -- A survey on algebraic and homological properties of amalgamated algebras of commutative rings (Yassemi) -- The ring of integer-valued polynomials on 3×3 matrices and its integral closure (Sodhi) -- Simultaneous p -orderings and equidistribution (Szumowicz) -- A survey on flatness in integer-valued polynomial rings (Tamoussit) -- Equivalent characterizations of non-Archimedean uniform spaces (Windisch).

Sommario/riassunto

This volume has been curated from two sources: presentations from the Conference on Rings and Polynomials, Technische Universität Graz, Graz, Austria, July 19–24, 2021, and papers intended for presentation at the Fourth International Meeting on Integer-valued Polynomials and Related Topics, CIRM, Luminy, France, which was cancelled due to the pandemic. The collection ranges widely over the algebraic, number theoretic and topological aspects of rings, algebras and polynomials. Two areas of particular note are topological methods in ring theory, and integer valued polynomials. The book is dedicated to the memory of Paul-Jean Cahen, a coauthor or research collaborator with some of the conference participants and a friend to many of the others. This collection contains a memorial article about Paul-Jean Cahen, written by his longtime research collaborator and coauthor Jean-Luc Chabert. .
