

1. Record Nr.	UNINA9910734848603321
Autore	Vanhoenacker Filip M
Titolo	Imaging of Synovial Tumors and Tumor-like Conditions // edited by Filip M. Vanhoenacker, Mohamed Fethi Ladeb
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-33635-6
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (273 pages)
Collana	Diagnostic Imaging, , 2731-4685
Altri autori (Persone)	LadebMohamed Fethi
Disciplina	616.720754
Soggetti	Radiology Orthopedic surgery Oncology Pathology Surgical Orthopedics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Anatomy and Histology of the Synovium -- Normal Anatomy and Histology -- Part II: Classification, Pathology, Genetics and Molecular Biology -- Classification of Synovial Tumors According to WHO 2020 -- Pathology, Genetics and Molecular Biology -- Part III: Imaging Modalities -- Ultrasound of Synovial Tumors and Tumorlike Conditions -- Radiography and CT in Synovial Tumors and Tumorlike Conditions -- Magnetic Resonance Imaging of Synovial Tumor and Tumorlike Conditions -- PET/CT in Synovial Tumors and Tumor-Like Conditions -- Diagnostic Algorithm of Synovial Tumors and Tumor-Like Conditions -- Part IV: Imaging of Synovial Tumors and Tumor-like Conditions of the Synovium -- Synovial Chondromatosis -- Tenosynovial Giant Cell Tumor -- Lipoma Arborescens -- Synovial Hemangioma -- Synovial Chondrosarcoma -- Synovial Metastasis and Lymphoma -- Synovial Amyloidosis -- Synovial Cysts, Ganglion Cysts, and Bursae -- Mimics of Synovial Tumors Due to Trauma and Inflammation -- Mimics of Synovial Tumors Due to Chronic Infection -- Part V: Treatment of Synovial Tumors and Tumor-like Conditions of the Synovium -- Surgical Treatment -- Nonsurgical Treatment. .

Sommario/riassunto

This vastly illustrated book offers a comprehensive survey of the role of imaging in the diagnosis of synovial tumors and tumor-like conditions. It gives an overview of the anatomy and histology of the synovium and discusses the classification, pathology, genetics and molecular biology of synovial tumors. The book presents the benefits of various imaging modalities in the diagnosis of these masses, which is important to provide appropriate treatment. *Imaging of Synovial Tumors and Tumor-like Conditions* will be a valuable resource not only for radiologists but also for orthopedic surgeons, oncologists, radiotherapists, and pathologists.
