

1. Record Nr.	UNINA9910734862903321
Titolo	Dynamics in Logistics : Proceedings of the 7th International Conference LDIC 2020, Bremen, Germany / / edited by Michael Freitag, Hans-Dietrich Haasis, Herbert Kotzab, Jürgen Pannek
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-44783-9
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XIII, 569 p. 185 illus., 117 illus. in color.)
Collana	Lecture Notes in Logistics, , 2194-8925
Disciplina	006.3
Soggetti	Industrial management Business logistics Artificial intelligence Industrial Management Logistics Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Maritime Logistics -- Supply Chain Management and Coordination -- Multi-modal Transport -- Intra-Logistics Systems -- Collaborative Planning and Control -- Internet of Things and Services -- Sensor Networks in Logistics -- Human-Machine Interaction -- Mathematical Optimisation for Planning and Scheduling -- Agent-Based Modelling and Optimization .
Sommario/riassunto	Since 2007, the biennial International Conferences on Dynamics in Logistics (LDIC) offers researchers and practitioners from logistics, operations research, production, industrial and electrical engineering as well as from computer science an opportunity to meet and to discuss the latest developments in this particular research domain. From February 12th to 14th 2020 for the seventh time, LDIC 2020 is held in Bremen, Germany. Similar to its six predecessors, the Bremen Research Cluster for Dynamics in Logistics (LogDynamics) organizes this conference. The spectrum of topics reaches from the dynamic modeling, planning and control of processes over supply chain

management and maritime logistics to innovative technologies and robotic applications for cyber-physical production and logistics systems. LDIC 2020 provides a forum for the discussion of advances in that matter. The conference program consists of three invited keynote speeches and 51 papers selected by a severe double-blind reviewing process. Within these proceedings all the papers are published. By this, the proceedings give an interdisciplinary outline on the state of the art of dynamics in logistics as well as identify challenges and solutions for logistics today and tomorrow.
