Nota di contenuto	Companies and artificial intelligence: an example of clustering with Orange -- The long-term enterprise.-Artificial Intelligence and Didactics: New Tools -- The role of Artificial Intelligence for the improvement and management of Global Value Chains -- Decision Making and E-democracy: Archimede a Tools to Support the Data-Driven Process -- Deepfake: creation, purpose, risks -- The use of Artificial Intelligence in the decision-making processes of the Public Administration: regulations and executive practice - the case of the Italian Public Administration -- AI, Competition and Antitrust Policies -- The formation of the homo and of the ecological space -- For an intangible urban planning. Culture as an engine for development .
Sommario/riassunto	The book aims to deal with the main advances in the study of artificial intelligence, the digital and circular economy, and innovation from a multidisciplinary perspective. Whoever governs the artificial intelligence will hold the keys to the world and the future. This book explains the growing role of artificial intelligence in our lives and the need to understand its mechanisms. The book presents original research articles addressing various aspects of artificial intelligence applied to

economics, law, management, and optimization. The topics discussed include economics, territorial policies, law, resource allocation strategies, information technology, and learning for inclusion. Combining the input of contributing professors and researchers from Italian and other foreign universities, the book is of interest to students, researchers, and practitioners, as well as members of the public in general, interested in the world of the artificial intelligence and economics.
