

1. Record Nr.	UNINA9910734895903321
Autore	Eski Yarin
Titolo	A Criminology of the Human Species [[electronic resource] ] : Setting an Unsettling Tone // by Yarin Eski
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Palgrave Macmillan, , 2023
ISBN	3-031-36092-3
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (151 pages)
Collana	Palgrave Studies in Green Criminology
Disciplina	364.01
Soggetti	Critical criminology Environmental sciences—Social aspects Victims of crimes Bioclimatology Psychology, Comparative Critical Criminology Environmental Social Sciences Victimology Climate Change Ecology Cross-species Comparison
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Dinosaurs, hot summers and the James Webb Telescope: Toward a criminological of the fatal human species and our extinction -- 2. Circles of life, death and rebirth: Previous mass extinctions, human-like species and the human species in the pre-industrial age -- 3. We destroy, therefore we are: The state of denial of our fatal nature and extinction -- 4. Space, the final frontier to exploit?: A criminological imagination of humans as extra-terrestrial harm -- 5. Conclusion, lessons, agenda.
Sommario/riassunto	“For those getting a bit bored with the endless stream of micro-criminological studies with little ideological bearing, this well-researched book is an unexpected treat. Pushing the limits of criminology’s interdisciplinarity tradition, it outlines how Homo sapiens as an intrinsically criminal species is bound to extinct itself and life on

Earth as we know it. The stakes are nothing less than the prevention of the Apocalypse.” -Jan van Dijk, winner of the Stockholm Prize in Criminology 2012 The book sketches out how the criminological lens could be used in the climate change debate around possible human extinction. It explores the extent to which the human species can be considered deviant in relation to other species of the contemporary biosphere, as humans seem to be the only species on Earth that does not live in natural balance with their environment (anymore). It discusses several unsettling topics in the public debate on climate change, specifically the taboo of how humans may not survive the ongoing climate change. It includes chapters on the Earth’s history of mass-extinctions, the global state of denial including toward the possibility that the human species could go extinct, and it considers humans’ future as a deviant, fatal species outside of Earth, in outer-space, possibly on other planets. It puts forward and enriches the critical criminological tradition by conceptualizing and setting an unsettling tone within criminology and criminological research on the human species and our extinction, by daring criminologists (and victimologists) to ponder and seek empirical answers to controversial imaginations and questions about our possible extinction. Yarin Eski is Assistant Professor in Public Administration and Co-Director of the Resilience, Security & Civil Unrest (ReSCU) R&I Lab at the Vrije Universiteit (VU), Amsterdam. He obtained his PhD from the University of Glasgow in 2015 and previously lectured at Liverpool John Moores University, UK. Yarin is Fellow of the Higher Education Academy in the United Kingdom.
