Sommario/riassunto	The basic elements of a contract, namely, offer and acceptance, the intention to be bound, and consideration, and requirements of form found in English, German, and Japanese law are compared against the background of their historical development, the legal consciousness and practices existing in these countries. In this way, awareness is built both of the theoretical or practical differences and the underlying socio-cultural reasons. This in turn aids in the comprehension of why certain variations exist, which, although sometimes deceptively small, may have great importance for contracting in practice.

Sommario/riassunto	This book focuses on the analysis of sensorial representations of violent images in contemporary films that portray embodied violation in urban environments of street clashes and prisons in Northern Ireland and Brazil during the late twentieth century. There is an emphasis on the representation of senses and how they play a significant role in structuring narratives and mapping the cinematic landscapes of conflict. Whether on the streets and prisons of Belfast, Derry, São Paulo or Rio, the attention is on the endangered body and its fragility or strength. Analyzing films through the novel framework of sensorial perspective enables the understanding of urban and prison landscapes

as part of a somatic geography that affects the corporeal engagement of the participants. As a multicultural study, this is an essential book for those interested in the relationship between cinema and history while taking into consideration the interactive roles of the senses and perception.
