

1. Record Nr.	UNINA9910735794903321
Titolo	Voice and communication in transgender and gender diverse individuals : evaluation and techniques for clinical intervention // edited by Mark S. Courey, Sarah K. Rapoport, Leanne Goldberg, Sarah K. Brown
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-24632-2
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (225 pages)
Altri autori (Persone)	CoureyMark S RapoportSarah K GoldbergLeanne BrownSarah K
Disciplina	616.85500867
Soggetti	Communicative disorders - Treatment Transgender people - Health and hygiene Transgender people - Mental health Voice disorders - Treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1. Background: Patient History and Evaluation -- Chapter 1. Introduction to the Care of Trans Gender Persons -- Chapter 2. Medical Management for Transgender Patients -- Chapter 3. Strategies for Evaluating Patients' Readiness for Surgical Intervention -- From a Psychiatric Perspective -- Chapter 4. Barriers to Care and Cultural Responsiveness in Trans and Gender Nonconforming Voice Modification -- Chapter 5. Patient Reported Outcomes & Data Collection in Treatment Seeking Transgender and Gender Nonconforming Individuals -- Part 2. Behavioral Interventions to Aid Transition -- Chapter 6. Applying Flow Phonation in Voice Care for Trans Women, Nonbinary, and Gender Nonconforming Individuals -- Chapter 7. Resonant Voice Care -- Chapter 8. Working with pitch in trans gender and gender nonconforming voice care -- Chapter 9. Nonverbal communication -- Chapter 10. The Singing Voice -- Chapter 11. Behavioral management

for masculinization of voice and communication across the gender spectrum -- Part 3. Surgical Techniques to Aid Transition -- Chapter 12. Surgical Concepts in Trans Gender Voice Change -- Chapter 13. Cricothyroid approximation -- Chapter 14. Laser-Assisted Voice Augmentation (LAVA) -- Chapter 15. Laser Reduction Glottoplasty: Vocal Fold Reduction Surgery for Feminine Voice Quality in Transgender Women -- Chapter 16. Modified Wendler Glottoplasty: Endoscopic Bilateral Partial Cordectomy with Primary Closure -- Chapter 17. Feminization Laryngoplasty -- Chapter 18. Type III Thyroplasty - Voice Masculinization -- Chapter 19. Thyroid Cartilage Reduction.

Sommario/riassunto

This book serves as a guide to any patient, clinician, or person who desires to understand how transgender and gender diverse individuals can be assisted in achieving voice and communication congruity with gender. Voice and communication style serve as intricate links to one's identity and are central aspects of the gender transition process. Guiding a transgender or gender diverse patient through this transition is complex, requiring an understanding of the patient's desires, the ability to identify and work with patients to achieve sustainable patterns of behavioral modification that affect voice in a positive manner, and an understanding of the role of newly emerging surgical techniques. This is best addressed by an interdisciplinary team, and this book makes this material available in one source. The first section of the book consists of introductory chapters written by primary care physicians, endocrinologists, and psychiatrists addressing the complex nature of transition from the medical standpoint. A review of hormonal replacement therapies, psychological evaluations, and potential effects of hormone replacement on voice is included. The second section describes the behavioral techniques available in speech and voice therapy for voice change and addresses outcomes that can be expected from behavioral intervention. Each chapter addresses the physiologic principles of therapeutic techniques for effecting change, techniques of instruction, nuances for transgender and gender diverse patients, methods of generalization, and methods of maintenance. Finally, the third section of the book details the surgical techniques available to assist patients in voice transition and their expected outcomes for voice modification. Each chapter includes an introduction, preoperative assessment, role of preoperative therapy, surgical technique, postoperative management, and expected outcome. This section also includes a surgical atlas. This is an ideal guide for otolaryngologists, speech-language pathologists, primary care providers, as well as psychiatrists and endocrinologists caring for transgender and gender nonconforming patients.
