

1. Record Nr.	UNINA9910736019303321
Titolo	Contact Dermatitis [[electronic resource] /] / edited by Jeanne Duus Johansen, Vera Mahler, Jean-Pierre Lepoittevin, Peter J. Frosch
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-319-72451-7
Disciplina	616.5
Soggetti	Dermatology Medicine, Industrial Allergy Occupational Medicine/Industrial Medicine Allergology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Basic Features -- Pathology -- Dermatotoxicology -- Clinical Features -- Diagnostic Tests -- Allergic Contact Dermatitis Related to Specific Exposures -- Therapy, Rehabilitation and Prevention.
Sommario/riassunto	The sixth edition of Contact Dermatitis covers in detail every conceivable aspect of irritant and allergic contact dermatitis and its modern-day management. The 1st edition of this book was published in 1992 and has served as the main reference book of contact dermatitis. In this new edition special emphasis is given to immunological mechanisms, molecular aspects of sensitizers, atypical clinical forms, patch test methodology, reactions to medicaments, and occupational and environmental factors. In order to optimize the diagnostic approach, a wide range of information is provided, including a dictionary of contact allergens and detailed information on exposure assessment. Retained chapters from the previous edition have been thoroughly revised to reflect the latest knowledge. Furthermore, completely new chapters have been added on a variety of topics, including contact allergy to medical implants, relevant allergens in gloves and immediate reactions to occupational materials. The editors

and authors are all leading practitioners in the field. The comprehensive but approachable text is supplemented by a large number of full colour illustrations and tables. Core messages highlight the most important information and will help the reader to gain a better understanding of the subject and greater competence in everyday practice.
