

1. Record Nr.	UNINA9910736021703321
Autore	Liu Xiufeng
Titolo	Advances in Applications of Rasch Measurement in Science Education / / edited by Xiufeng Liu, William J. Boone
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	9783031287763 3031287762
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (531 pages)
Collana	Contemporary Trends and Issues in Science Education, , 1878-0784 ; ; 57
Altri autori (Persone)	BooneWilliam J
Disciplina	507.1
Soggetti	Science - Study and teaching Educational tests and measurements Educational psychology Science Education Assessment and Testing Educational Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Forward -- Preface -- Chapter 1 Introduction to Rasch measurement in science education: Principles and best practices -- Chapter 2 Rasch models: Recent Developments -- Chapter 3 Open source packages for conducting Rasch analyses -- Chapter 4 Using Rasch measurement to study learning progression in science education -- Chapter 5 Using Rasch measurement to develop formative assessment in science education -- Chapter 6 Using Rasch measurement for cognitive diagnostic testing in science education -- Chapter 7 Using Rasch measurement for computer adaptive testing in science education -- Chapter 8 Using Rasch measurement for setting performance standards in science education -- Chapter 9 Using Rasch measurement to assess complex science learning outcomes in science education -- Chapter 10 Using Rasch measurement to research three-dimensional science learning in science education -- Chapter 11 Using Rasch measurement to investigate student reasoning -- Chapter 12 Using Rasch

measurement to develop observation protocols in science education -- Chapter 13 Using Rasch measurement to investigate science teachers' pedagogical content knowledge in science education.

Sommario/riassunto

This edited volume presents latest development in applications of Rasch measurement in science education. It includes a conceptual introduction chapter and a set of individual chapters. The introductory chapter reviews published studies applying Rasch measurement in the field of science education and identify important principles of Rasch measurement and best practices in applications of Rasch measurement in science education. The individual chapters, contributed by authors from Canada, China, Germany, Philippines and the USA, cover a variety of current topics on measurement concerning science conceptual understanding, scientific argumentation, scientific reasoning, three-dimensional learning, knowledge-in-use and cross-cutting concepts of the Next Generation Science Standards, medical education learning experiences, machine-scoring bias, formative assessment, and teacher knowledge of argument. There are additional chapters on advances in Rasch analysis techniques and technology including R, Bayesian estimation, comparison between joint maximum likelihood (JML) and marginal maximum likelihood (MML) estimations on model-data-fit, and enhancement to Rasch models by Cognitive Diagnostic Models and Latent Class Analysis. The volume provides readers who are new and experienced in applying Rasch measurement with advanced and exemplary applications in the forefront of various areas of science education research.
