

1. Record Nr.	UNINA9910451312303321
Autore	Salamon Lester M
Titolo	The resilient sector [[electronic resource]] : the state of nonprofit America / / Lester M. Salamon
Pubbl/distr/stampa	Washington, D.C., : Brookings Institution Press, c2003
ISBN	0-8157-9609-9
Descrizione fisica	1 online resource (121 p.)
Disciplina	338.7/4
Soggetti	Nonprofit organizations - United States Associations, institutions, etc - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.

2. Record Nr.	UNINA9910739412203321
Autore	Elgazzar Abdelhamid H
Titolo	Synopsis of Pathophysiology in Nuclear Medicine / / by Abdelhamid H. Elgazzar
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-03458-8
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (370 p.)
Disciplina	610 616.07 616.07548 616.0757
Soggetti	Nuclear medicine Radiology Pathology Nuclear Medicine Imaging / Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index at the end of each chapters.
Nota di contenuto	Pathophysiology: General Principles -- The Cell and Tissue Biology -- Basis of Radiopharmaceutical Localization -- Basis of Inflammation and Infection Imaging -- Basis of Musculoskeletal imaging -- Basis of Genito-urinary imaging -- Basis of Endocrine system imaging -- Basis of Cardiovascular System Imaging -- Basis of Digestive system -- Basis of Nuclear Oncology -- Basis of Respiratory System Imaging.- Basis of Central Nervous System Imaging.- Basis of Nuclear Haematology -- Basis of Therapeutic Nuclear Medicine -- Biological Effects of Ionizing Radiation.
Sommario/riassunto	Improved understanding of the pathophysiologic changes in different diseases, including the molecular mechanisms of pathologic conditions such as tumors, has enhanced our ability to apply non-invasive techniques to investigate these diseases and permitted earlier detection and better management. It has also expanded the use of functional

imaging, including molecular imaging. This synopsis is a companion to The Pathophysiologic Basis of Nuclear Medicine and arose from the recognition that there is a need for a compact, readable account of this complex and important subject. The companion book concisely describes relevant anatomic and physiologic considerations for each organ system and the pathophysiologic features of different relevant diseases, and relates them to the scintigraphy of each system. It thereby provides an informative synopsis of the pathophysiologic basis of nuclear medicine and molecular imaging. The volume will serve as a quick reference that will help the reader to understand different scintigraphic patterns and to select appropriate treatment modalities based on functional imaging. It will prove useful to undergraduates and postgraduates as well as to practitioners in clinical and research fields.
